SOLUTIONS
FOR INDUSTRY

BALAENA d.o.o.

BALAENA d.o.o. Croatia was established in 1998. in Rijeka.

With our enduring experience of many years and constant keeping of vigilant eye on technological development in industry we are capable to offer solutions for the most complex problems in industrial control systems in different industrial fields.

It includes automation and control, supervision and protection of industrial plants, production lines and machines.

Numerous projects worldwide give evidence about our products and services in control systems.

BALAENA offers complete engineering and turn-key solutions concerning to:

- engineering from planning phase up to final commissioning
- manufacturing of low-voltage electrical panels (measurement, control, protection, MCC)
- development of control software (for PLCs of different manufacturers)
- development of supervisory control and data acquisition applications (SCADA)
- power factor correction
- control and management for high peak power
- commissioning of plants
- training of final users
- maintenance

- right partner for your productivity

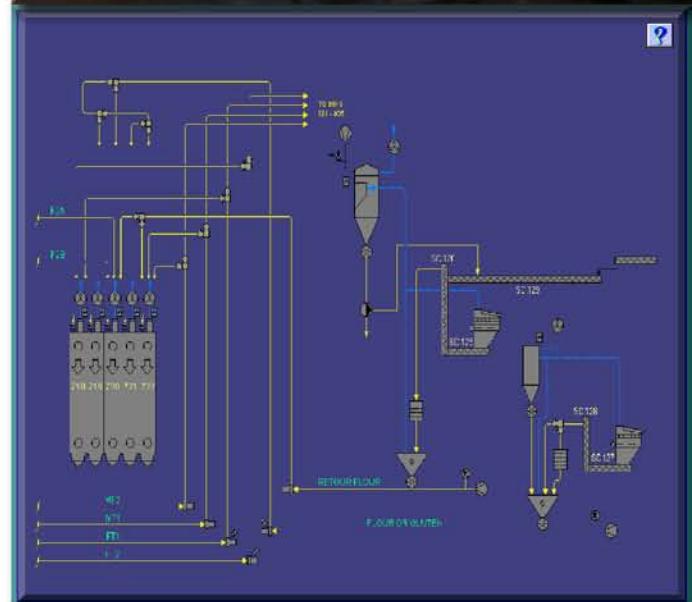

For our projects we use only high quality materials and components of branded manufacturers. Our own development and production give us competence to satisfy specific requests of our clients.

Business relationship with our clients is based on development, engineering, production, erection, commissioning and maintenance of plants, production lines and machines.

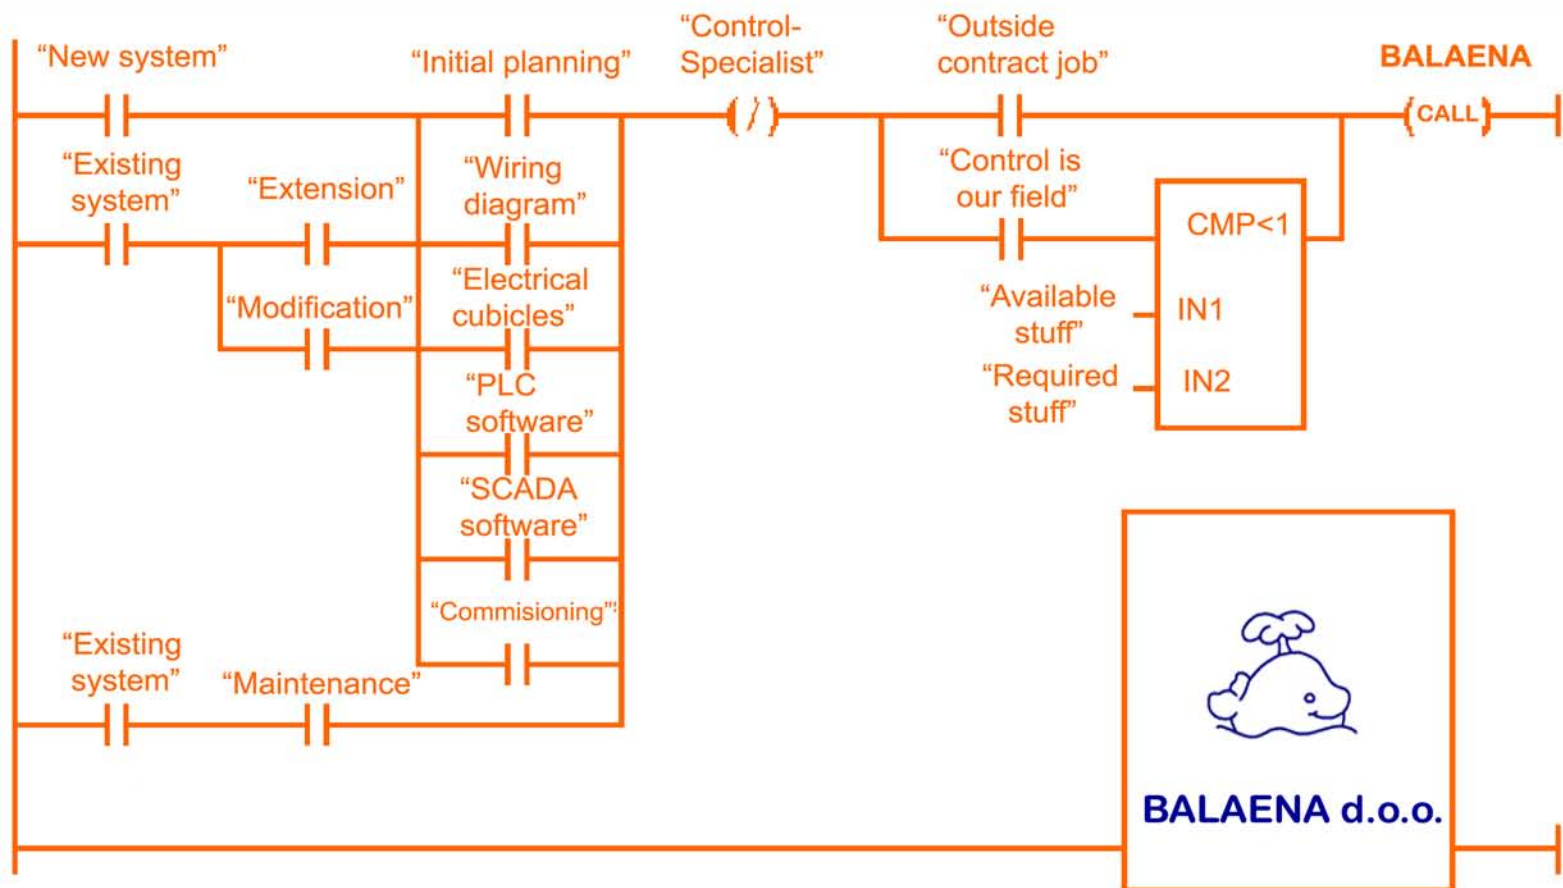

OUR SERVICES:

- consultancy
- engineering
- determination and supply of equipment
- equipment and software installation
- adjustment and system optimisation
- technical support
- training of final users
- PLC programming courses
- control system maintenance
- process equipment maintenance
- commissioning
- project analysis

In all of these fields we have references all over the world as main contractors or as partners of other European companies.
